

Ongoing supervisions

Product information

Our service team are located around Sweden and come out to you as a customer to perform inspection and continuous supervision of your lifting and fall protection equipment. CERTEX perform inspections on lifting your equipment according to AFS 2006:06 which stipulates that lifting accessories shall be checked for safety for the user.

Our service staff register all tools in the web-based tool CertMax+. Through a login, you as a customer then have easy access to information about your lifting equipment and can see when it's time for the next inspection.
